

Plate Curing Equipment

For Baking CTP & Conventional P.S. Plates

"Memory" Plate Curer is designed to Bake CTP & Conventional P.S. Plates.

Sturdy mild steel Powder Coated fabrication.

Operator friendly control panel includes main on/off, digital temperature meter with thermostat, Amp. meter & electronic timer with buzzer.

The oven is specially designed to save heat loss and is completely insulated thus avoids Hot Air in the surrounding areas.

Thermostatically controlled Hot Air maintains inside temperature evenly thus ensures even baking at a temperature ranging from 220°C to 250°C.

Baking helps to give large print runs with same sharpness thus ensures smooth running on press and easy to store plates for repeat jobs.

Four plates can be baked at a time.
