

## Semi Automatic Case Making Machine

The Case Maker consists of Manual Gluing Station for Hot Melt or Cold Glue, Board Placement with Pneumatic Control, Turning-in Station and Pressing Station. The Case maker is equipped with in-direct heating for hot melt glue with facility to add water which evaporates due to heat.

The cover duly glued is held with high speed suction for placing the boards manually. The adjustment for using small and big boards is simple & operator friendly. The Pressure rollers bind the cover with the board and stacks in the stacker. Whole operation takes 15 seconds to make a case.
